Description

RICHIE KOTZEN'S PERSONALLY OWNED & USED TECH 21 RK5 V2 FLY RIG – SIGNED CASE + PHOTO INCLUDED

This is Richie Kotzen's actual RK5 V2 Fly Rig — personally used and housed in a Tech 21 metal tin case hand-signed by Richie himself.

This unit shows signs of **real-world touring use**, including yellow tape labels added by Richie to help navigate the pedal during **low stage lighting**. The footswitches are clearly marked "**DLY**" and "**SM**" (Delay and Small Reverb), offering a direct glimpse into how Richie set up his gear for quick on-the-fly control during live shows.

This is an actual pedal owned and played by Richie — it's a **working pedal straight from Richie's gear arsenal**. The includes **Tech 21 collector's tin** that has been **hand-signed by Richie**, and you'll also receive a **photo of him signing the case**.
