LOT 25 - The SECRET Richie Kotzen USA Custom Shop PROTOTYPE -Horror Guitar

Description

The SECRET Richie Kotzen USA Custom Shop PROTOTYPE -Horror Guitar

Built by Ibanez L.A. Custom Shop – The “Lost” Successor to the Iconic Horror Guitar

Until now, **no one knew this guitar existed** except some fans that saw a video walk through in Richies house back in the day where he briefly showed it.

Crafted behind closed doors, this is the **official Ibanez USA Custom Shop prototype** designed to follow in the footsteps of Richie Kotzen's iconic **Horror Guitar**. Built by the hands of one of the greats and **never released to the public**, this is a TRUE **1-of-1 Ibanez 100% Custom Shop ghost guitar** — uncovered after 35+ years.

Hand-built by legendary luthier **Mike Lipe** at the Ibanez L.A. Custom Shop
Custom horror-themed artwork by **Pedro Cruz** – a unique design with Richie's personal influence

Features **neck-through-body construction** for unmatched tone and sustain

True one-of-one – no replicas, no backups, no reissues

Kept in Richie's private collection for over 35 years – stored in his homes, either on display or safely in its case

Still has the **original strings** Ibanez strung it with

Comes with the iconic **pink strap, Ibanez hardshell case, and tremolo bar**

This was Ibanez's early answer to the question: *What if we built an official Kotzen model based on his Horror guitar?* And this prototype is the answer.

✂ A **hidden chapter** in Richie's gear story — and now, it's finally coming to light.

You don't just collect this...

You **become the only person on Earth** who owns it and that my friendsis straight up Rock N' Roll !
