**LOT 71 - VACUUM-ACTUATED SLIP SHEET / DIVIDER PLACEMENT UNIT –  
PNEUMATIC LIFT STATION**

**Description**

## VACUUM-ACTUATED SLIP SHEET / DIVIDER PLACEMENT UNIT – PNEUMATIC LIFT STATION

This unit is designed to **automatically pick and place slip sheets, layer pads, or cardboard dividers** onto pallets or conveyor lines.

### Key Features:

- Vacuum suction arm with multiple cup pickups and spring-tension return
- Pneumatic controls with mounted regulators and airline filters
- Flat loading platform for stacked blanks or sheets
- Heavy-duty steel frame with integrated table and guard plates
- Control box with simple push-button interface (Start/Stop)

Commonly used for placing **layer pads between stacked products**, prepping pallets with slip sheets, or feeding flat blanks into an automated system.

See all images for detail. Clean and functional with visible controls and components.

**Quantity:** 1
