**LOT 77 - DoALL 1612-1 Industrial Contour Band Saw – 440V 3PH**

### **Description**

#### **DoALL 1612-1 Industrial Contour Band Saw – 440V 3PH**

Built like a tank and made to run forever—this DoALL 1612-1 Contour Band Saw is the kind of machine shops keep for decades. If you know fabrication, you already know DoALL didn't cut corners. This one's 440V 3-phase with speed/feed controls and a

built-in job selector to dial in the right cut fast. Foot pedal control and cast iron table make it ideal for precision jobs and hands-free operation.

Perfect for a machine shop, fab shop, or anyone cutting steel, aluminum, or hard plastics. Want to slice curves in ½" plate? No problem. Want to rough out stock all day without killing blades? That's what this beast was built for. Could use a little TLC or run it as-is—either way, you're getting old-school American iron that's still ready to earn its keep.

A serious saw for serious shops. Don't sleep on it.

**Quantity: 1**
