LOT 157 - Industrial Ram Press Trainer on Rolling Frame

Description

Industrial Ram Press Trainer on Rolling Frame

Heavy-duty training unit used to simulate ram press operations in an industrial production environment. Originally stationed in the facility's training area to teach staff the mechanics and maintenance of larger-scale refractory or forming equipment.

Includes a vertically actuated ram or plunger assembly that feeds into a ceramic-lined chamber, mounted on a mobile steel frame with safety shield and Impulse Drive control. Manual adjustments and linkages allow hands-on demonstration of system movement and pressure components.

No manufacturer tags visible—application mirrored full-size shop equipment used for pressing, forming, or compacting in ceramic or materials processing. Sold as shown

Quantity: 1
