LOT 164 - Waldon 5100 Loader – Runs, Lifts, Tilts, and Moves!

Description

Waldon 5100 Loader – Runs, Lifts, Tilts, and Moves!

Don't let the surface rust fool you—this little beast has plenty of muscle left under the hood. Fired right up and has a **brand new battery**, and we tested the basics: **drives forward, backward, bucket lifts and tilts.**

Heavy steel construction, compact design—perfect for tight maneuvering in yards, salvage operations, warehouses, scrap, demo zones, or farm use. Doesn't take up much space, but punches way above its weight.

You want a unit that's not afraid to get dirty and do the grunt work? This is it. Could it use a little TLC? Sure. But could it make your next job easier by tomorrow morning? Absolutely.

Great candidate for a light restoration, or just throw it into the field and let it work.

Quantity: 1
