**LOT 470 - Heavy-Duty Industrial Steel Rod Rack on Casters – Shop Storage or Decor Statement Piece**

**Description**

**Heavy-Duty Industrial Steel Rod Rack on Casters – Shop Storage or Decor Statement Piece**

**Approx. Dimensions: 60" L x 24" W x 46" H**

This rugged steel rolling rack was built for the factory floor but brings just as much attitude to your garage, workshop, or industrial-themed space. Constructed from heavy-gauge steel with welded rod holders on both sides, it was originally used for organizing round stock or tool shafts in a precision machining environment.

- Oversized casters for easy mobility (even under weight)
- Integrated handle for quick movement
- Lower flat deck shelf for added storage
- Rod prongs on both sides – great for holding tools, metal stock, wood dowels, or creative displays
- Weathered patina on top surface for that raw, industrial aesthetic

Perfect for continued use in a fabrication or machine shop, or reimagined as a bold retail display rack, loft-style kitchen organizer, or garage standout.

**Use it. Show it off. Repurpose it.** This is a serious piece of industrial Americana.

**Quantity: 1**
