LOT 501 - Massive American Steel Multi-Tier Industrial Rack – 7'10" Tall – Built to Hold Serious Weight

Description

Massive American Steel Multi-Tier Industrial Rack – 7'10" Tall – Built to Hold Serious Weight

Description:

Straight out of a heavy-duty American factory floor—this beast of a rack stands 7'10" tall and is built from serious structural steel. Each shelf is approximately 10" high and 4' deep, with full-width supports designed to handle large crates, heavy pallets, or industrial molds.

While not a traditional cantilever, this tank-like storage unit is ideal for any shop, warehouse, or repurposing project. Use it for tool die storage, engine blocks, shop materials, or convert it into a killer garage or retail fixture.

Quantity: 1
